Southside Finally Connected!

After three years of dealing with private easements, rock and boring under two highways, the southside connection is finally being made. This will double the current capacity and will improve flows to the Steeplechase tanks, which support Steeplechase Drive, Five Hills, Longview Drive and Nature Pointe.

Monitor Spring Water Pressures

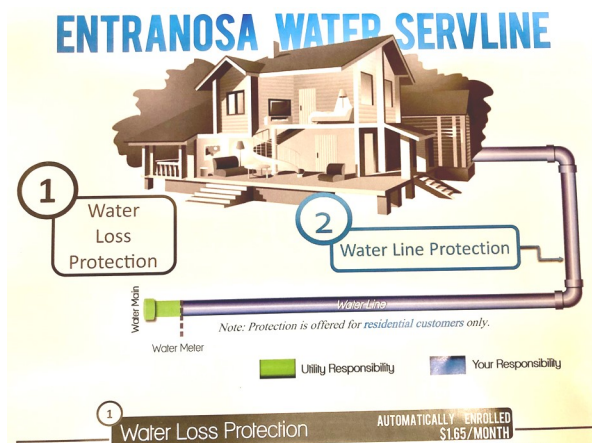

A new shipment of pressure gauges just arrived in time for pumping season. As the weather warms up, more demand is put on the system, which increases pumping and pressures. Please start monitoring your pressure now and remember—any pressure over 80 psi needs to be reported to the Entranosa office. If you mention that you saw this announcement in the newsletter and need a pressure gauge, you can purchase one for \$5.00— a 50-percent savings.

Update on Servline Protection

Reminder, yard line leak protection only covers

your yard line from the meter to your home. If you have connected to your yard line with a hydrant or added a second line to another building, any leaks at the connection point or secondary lines are NOT covered with leak protection.

Surplus Property for Sale

Entranosa Water & Wastewater is divesting

itself of unneeded heavy equipment. Entranosa members and staff have the right of first refusal. After May 1, please visit the Entranosa website at www.entranosawater.com to see the minimum bid amount, plus information on viewing dates and sale deadlines. These items are currently available:

- LeRoi Dresser Compressor — Minimum Bid: \$500
- Wacker Compactor — Minimum Bid: \$100
- Ditch Witch Earth Auger — Minimum Bid: \$2,000
- Ditch Witch Dr-52 Compactor — Minimum Bid: \$50

After millions of dollars and over two years of upgrades to the system, System Manager Drew Padilla and System Operator Steve King reached the association's goal of producing 1,200 gallons per minute (gpm) at the Frost Road midline booster station. The transmission lines along Frost Road are the backbone of the Entranosa system which needed increased flow to meet demand. The new upgrades have increased the flow over 300 gpm.

The computer readout below at the Frost Road midline booster station tells the story

Improving Pumping Capacity at Nugent

Over the

cooler months, Entranosa increased the pumping capacity at Nugent booster station. The new pumps have also increased the heat generated during summer months. This required Entranosa to install a new high-efficiency heat pump to replace the old, less efficient swamp cooler.

Entranosa's Board of Directors

Chair : Linda Barbour **Vice Chair:** Lee Liggett **Secretary:** Rik Thompson **Treasurer:** Dennis Hodges **Members:** CJ "Skip" Mead, Paul Gorder, Rob Baracker
